

Free Vascular Screening Event

Thursday, August 23 | 1 – 5 p.m.

UNIVERSITY HOSPITALS ST. JOHN MEDICAL CENTER
29000 CENTER RIDGE ROAD, WESTLAKE

More than 50 percent of those with peripheral artery disease (PAD) have no symptoms.

PAD is a serious condition that occurs when blood flow through the legs and feet is restricted by the build-up of fatty deposits in the blood vessels of the legs. It can cause pain and cramping that can make walking – and life – miserable. In extreme cases, PAD can result in the loss of a leg or foot to amputation.

If you answer yes to any of these questions, find out your risk at our free screening event:

- Are you 50 years of age or older?
- Do you have diabetes?
- Have you ever smoked?
- Do you have high blood pressure and/or high cholesterol?

Call 1-800-883-3674 to schedule.

Reservations are limited and preregistration is preferred.
